Beautiful updated 3 bed, 2 bath home on 2.6 acres. Has walk out basement, attached garage, large open space with 20x30 slab area for future building and fenced in area. Many updates include the kitchen with custom quartz countertop and home style cabinets, added space for washer and dryer and built in refrigerator. Mostly all new floors, updated fixtures, walk in master closet and so much more. Basement space could be used as 4th bedroom or with walk out would make nice living space. Home should finance most loan programs.
